ASSATEAGUE

AND NOT JUST HORSES

AND NOT JUST HORSES

In the daily weave of our lives, those who have died are still strong, guiding threads. Theirs is the golden glimmer or perhaps the brilliant red or the melancholy blue—still they are part of the whole cloth of our lives. They are the ancestors: the “goers before”.

In the hour-to-hour rush of our daily tasks, they travel with us through something they taught us which is now ours to do, through something they loved which is now ours to carry out, through something we shared which is now ours alone and yet not.

They are more than remembered, they are memory itself. For what we love lives on -their words and wisdom our guide, their humor our relief, their restless concern for the world our charge. Through this, we know immortality.
